Dear Naomi McIntosh -
We love Hawaii & come every year on holiday - we love the marine life you have - Humpback whales, sea turtles, seals to name a few - We heard you are making changes to your management plan and know your name is Hawaiian Islands Humpback Whale Nat. Marine Sanctuary - but would you please include conservation & management of all marine species - you have the very, very endangered Monk Seal - There are many marine species only found in or around Hawaii - it would be a great tragedy if they were gone! I would be most grateful & would appreciate a kind reply. Sincerely Irene
