Subject Protect the Whales

Since the 'Hawaiian Islands Humpback Whale National Marine Sanctuary' has no rules or laws to protect whales in their mating/birthing/nursery waters, (other than 100-yard approach limit), I demand that you do your best and most compassionate job to enact rules and laws to protect the whales and their ocean habitat from Vessel Strikes. Sonar & Acoustic Impacts, Water Pollution, Habitat Degradation and Net Entanglement.

Very sincerely,

Fred Dente, [REDACTED]
