Sir or Mam

A strict kapu(managment/off limits) system needs to be strictly enforced to protect the Humpback whales that migrate here.

This system should include fish and the entire aquatic relm that surrounds and supports us. The ancient Hawaiians worked with nature not against it. We are killing our environment which in turn is killing us all.

Everything matters.

I look forward to the progress
to a sustainable future for ALL.

Regaurds,

Kaitlyn Livingston McKee
