

Q1

- Commercial captain and rescue watercraft: many that use jet skis are restricted
- Involved in education programs with the sanctuary: it's important to be involved to help the ocean environment
- Volunteer: protect all marine animals
- Support NOAA and ensure that Hawaiian cultural issues are addressed
- Member of partner organization: wants to see cultural growth
- Education partner: wants to see Maui get the money it needs
- Pacific Whale Foundation: wants to learn about the process, if there are realistic goals, and how long the process takes
- Learn more. Noticed that the water gets dirty at Makena. The ocean is our future.
- Individual advocating for a proposal in the County Council to protect whales more
- Paddler: there's a loophole that allows sewage to be dumped. [Regarding whale protection], there were rules already in place (e.g. ESA, approach) [before the sanctuary]
- Curiosity. Would like to see protection for other critters.
- Interest in sanctuary mission – have ideas for future
- Learning all that I can and I care
- Rules and regulations – amendments for fishing
- Behalf of group of 40 jet ski fishermen seeking amendments on sanctuary guidelines
- Live on Oahu, learned about sanctuary already, on Oahu, didn't know
- PWF work with entanglement issue – learn more ie.: mission
- How could sanctuary affect bottom fishing?
- Interest in ensuring sanctuary can help protect marine resources – above and beyond humpbacks
- Love the ocean, interested in seeing MPR process, how similar to ???, see how I can contribute
- Interested in how marine ecosystems affect people and coral reefs
- Interested in marine issues/ running for office
- SAC Alternate/ member
- New to the islands
- Volunteer
- Came here to learn
- Interested in knowing what can be done
- Questions about changing

Q2

- Yellow flag on boats (indicating research): you can do whatever you want
- Whales act weird on days with two nuclear submarines nearby
- [Concerned about] all marine mammals and turtles and fish. [Sanctuary needs] real teeth: enforcement

- Problem because state-federal partnership...we don't have enforcement officers. Also need better coordination.
- More presence
- Better laws that say what appropriate behavior is
- Broader mission does make sense...don't know extent of outreach to the fishing community...seems like they're not onboard
- Sanctuary has been doing multi-species [already]...if sanctuary can help with enforcement, [it needs] frontline grassroots people behind it
- Ahihi kinau = good example [that shows that a protected area] works
- Not a battle, all in this together. How to get out to the community?
- Incorporate bigger picture, work into management plan in practice
- Partnerships get convoluted
- Marine debris: hard time reporting...who do we report it to? There is no quick response team
- What's our mission this year? How do we get things done? How do we plan? [Sanctuary] needs more [public] meetings, and communicate annual plans
- Transparency with the budget
- Number of whale strikes has been escalating, how do we stop that?
- MPA for each island that is totally protected. Zoning, no-go rules
- Reef protection rules: water quality and fishing regulations
- Noise rules [because whales get disoriented]
- Propeller protection
- Fund DLNR at least on Maui
- Go after (in other words, enforce) the ESA and enforce the MMPA
- Ban aquarium reef fish collection
- Ensure accurate and up-to-date information
- Expand scope to ecosystem – additional species (ocean, nearshore, streams)
- More “teeth”
- Multi-species to include more of the ecosystem (water quality, reefs)
- Be more involved/ engaged at a policy level (e.g. climate change)
- More partnerships with other groups
- More publicity of related laws
- More education on other species (coral reefs)
- More enforcement/ more presence
- Concerned about diluting efforts under limited resources
- Educating more than school groups
- Educate the teachers
- Raise awareness for voluntary compliance
- Educate about fishing (may need to expand mandate)
- Be more involved in cultural issues
- Enforcement and protection of injection wells

Q3

- Does anyone enforce illegal subsurface buoys? [which are placed and GPS marked by fishermen]
- [The sanctuary should use the help of] jet ski network / association
- Why don't we have authority? E.g. OLE officer
- Can the sanctuary do anything about run-off?
- What is the sanctuary's definition of "sense of place"? How do you accomplish it?
- Number of staff? Division of effort to tourist versus local education?
- What kind of advisory panel contributes cultural information (either regional or local)
- Where is the money going? How is it allocated? [Knowing this would help the public to understand why there's no enforcement.
- Volunteer program: size, scope, role?
- What sort of enforcement would we do? Recreational, fishing?
- How was the boat-strike incidents handled? Where does the fine money go?
- Ship strikes, etc...why can't we enforce [things] when other sanctuaries can with similar budgets?
- How does the budget / role / how and where actions are done compare to other sanctuaries?
- Why did the sanctuary wait to do management plan review?
- Why can't we complete the management plan review in less than 3 years versus 5 years?
- Where are the teeth?
- Sanctuary's position on open-ocean aquaculture?
- What has Naomi created in terms of rules / regulations in the time she's been with the sanctuary?
- What triggers cultural involvement? At what point do you determine that a cultural person should be involved? Is it surface-level involvement or in-depth? How are we committed?
- Regulations for commercial / cruise vessels
- Is there anyone from the sanctuary attending IWC in Morocco?
- How can we improve the relationship between sanctuary and other stakeholders in Maui and other Hawaiian islands?
- Do marine sanctuaries work?
- Why is there no enforcement of rule #5? – No dumping in sanctuary waters or outside waters that will affect sanctuaries waters?
- Given sanctuary is federal government agency, how can we trust that actions are based on science rather than politics?
- Is it possible to amend the law that prohibits jet ski fishing during whale season (Maui)?
- Could we designate areas for jet ski fishing in the sanctuary?
- Is there an internship program for high school and college students with sanctuary?
- If humpbacks get de-listed does sanctuary go away?
- If other resources are added – what are the criteria for including specific resources or issues such as injection wells that may affect other species? What is the precedence to add other resources?
- Does everything that you currently do for protection have to pertain to humpback whales?

- Is this the only single species sanctuary? Could you drop humpback from sanctuary name if additional species were added?
- Who is in charge of enforcement if additional resources are added?
- I don't see any reason for sanctuary – a lot of whales – whenever there is a sanctuary there could be regulations that affect the livelihood of fishermen. How will sanctuary regulations affect fishermen? (existing and any new regulations?)
- Sanctuary volunteer on every commercial boat during whale season
- “Focus Maui Nui” was not implemented, will this actually be implemented?
- Is it possible to separate from the state?
- Could a final plan be implemented before 2014?
- Why can't this be done sooner?
- Will there be enough funding / enforcement if the sanctuary expands scope? May need to have realistic expectations
- Volunteers are already doing outreach beyond mission. Would like it to be officially part of sanctuary for funding support
- How can sanctuary reach out to kayakers and standup paddlers?
- If sanctuary included WQ in its scope, would this expand mission to include broader ecosystem?
- Tsunami warning system/ How can funding disaster relief be secured to protect this?
- Are the sanctuary boundaries going to be extended/ changed?
- What is the procedure? What information is needed? How is it decided?
- How are new species added?
- How does the sanctuary get more people/ volunteers involved? Incentives? Recognition?

Q4

- Tourists, visitors
- Native Hawaiian community
- Families
- Locals
- Interagency cooperation, address chain of command
- Reach out to 'ohana, get them to understand that we're working together
- Locals are the enforcers
- Use media; papers, presentations
- Commercial for Channel 7: how to take care of the ocean, work with the [Maui] Ocean Center
- Cultural protocol for whale deaths
- Other National Marine Sanctuaries that do have protections
- Reach out to other parts of the world (in terms of marine debris, for example)
- Hard time finding location even though public meeting
- Maui Nui Marine Resource Council
- Craigslist

- Maui Bulletin
- Radio (several spots over time, local stations may do free PSAs)
- Fishery council rep
- Signs or posters in key locations
- Maui Job Corps
- Text messages
- Dress Al up as a whale and Jerry a turtle

Individual Sheets

- Be accountable to the values and visions agreed upon yesterday throughout the MPR process.
- More involvement with schools
- Outreach: Local communities, ie: Hana, Waihee, etc., Native Hawaiian schools – Kamehameha
- Will the information gathered at this meeting be recorded and shared?
- Groups to include: parent groups in schools (PTA, etc.)
