

VIRTUALLY DIVE INTO YOUR SANCTUARY

Come and discover the science happening in your back yard!

Saturday, August 22, 2015 6:00 PM – 8:00 PM
Hawaiian Islands Humpback Whale NMS – Kīhei
726 S. Kīhei Rd, Kīhei, HI

- Learn about the XL Catlin Seaview mission
- See the cutting edge equipment used for the surveys
- Discover the coral reefs in your backyard without even getting wet
- Learn about climate change and coral bleaching
- Hear about how you can help the ocean

In August 2015, a team of international scientists will be surveying coral reefs within the Hawaiian Islands Humpback Whale National Marine Sanctuary. In response to the decline of coral reefs, the XL Catlin Seaview Survey is creating a baseline record of the world's coral reefs, in high-resolution 360-degree panoramic vision.
