

Sea Creatures in Hawai'i

NATIONAL MARINE
SANCTUARIES™
HAWAIIAN ISLANDS
HUMPBACK WHALE

Can you match the sea creature on the left with its Hawaiian name on the right?

___ **'ina:** Common rock-boring sea creatures found on Hawaiian reefs.

___ **nai'a:** Part of the same family as whales and porpoises, this marine mammal is often seen in waters off our islands.

___ **'iio-holo-i-ka-uaua:** An endangered, endemic marine mammal found mainly in our northwestern Hawaiian islands.

___ **he'e:** Noted as the most "intelligent" invertebrate, this animal has the ability to change their skin color to match their surroundings.

___ **koholā:** This endangered species migrates to Hawai'i each year during the winter and has a national marine sanctuary that protects it.

___ **humuhumu-nukunuku-ā-pua'a:** The unofficial state fish of Hawai'i that is known to grunt like a pig.

___ **manini:** A commonly seen sea creature around Hawaiian reefs.

___ **manō:** In native Hawaiian culture, this animal is used as an 'aumakua, or family guardian spirit.

___ **honu:** One of three common species of reptile seen in Hawaiian waters, this species is listed as threatened.
